The Powers of Woman

ÉDITIONS

PROSVETA

'On the physical plane, of course, the woman is weaker than the man; but the powers of the woman is immense. **Those powers are found in a special magnetism that she possesses in the form of small subtle particles that escape from her.** It is not in the physical plane that women have the most powers, but in the field of etheric emanations, and if some men see in her a witch, a magician or a fairy, it is because of this magnetism that nature has given her. **Thanks to these emanations, women are even able to form bodies of an etheric nature.**

So, if in many parts of the world, women conscious of those powers decided to work together on **the idea of light, love, peace, fraternity**, they would form a collective child in the invisible world that would influence all consciences.'

Cosmic Creation:

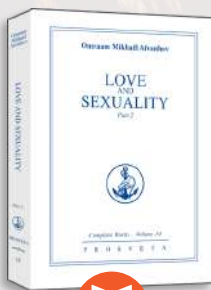

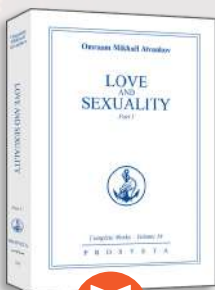

Union of the Masculine and Feminine

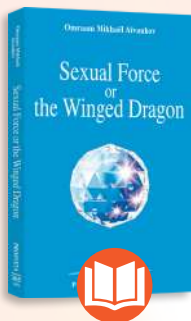

'There are two fundamental principles in the universe which are reflected in every single manifestation of nature and of life: they are the masculine and feminine principles. The whole of creation is the result of the concerted work of these two principles which are replicas of the two creative principles of the cosmos.'

Love and Sexuality (2 volumes)

'Sexuality tends to be self-centred. It drives man to seek only his own pleasure, even to the detriment of others. Love, on the other hand, thinks of the other's happiness above all else. It is based on self-denial and sacrifice: the sacrifice of one's time, energy and money, even the sacrifice of one's gratification, for the sake of helping the other, of allowing the other to blossom and develop his full potential. Nothing is more beautiful than love, when you are ready to do without, to give up what you have or what you enjoy.'

Sexual Force or the Winged Dragon

'Sexual energy is like petrol: if you are ignorant and use it carelessly you will burn yourself; your very quintessence will be destroyed by this all-consuming force. But Initiates, who know how to handle it, use it to move freely about the universe'. This is the true meaning of the winged dragon.'

The Role of the Mother during Gestation

"Throughout her pregnancy, a mother must try to create an atmosphere of purity and light around her child, so that she can work in collaboration with the incoming soul. Even though she cannot see this soul, she can at

least talk to it: "Look, I will help you, I will give you the best materials, but you too can give qualities and virtues to my child so that it may become a magnificent being."

The moment a mother utters these powerful, magical words, specific particles emanate from her and the spirit of the incarnating child takes them so as to build its different bodies. The child itself has nothing, it receives all it needs from its mother. That is why she must be conscious and, by her thoughts and feelings, give it only the most luminous and purest particles."

Female choir (Bulgarian Songs)

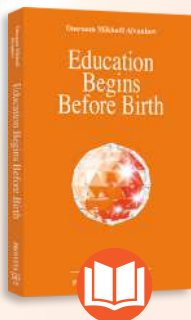

Simple CD – 25 songs
– Duration: 50'06"

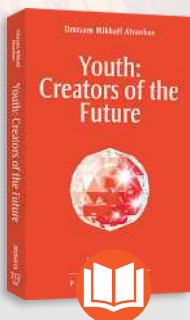

Education Begins Before Birth

'Is it possible for education to begin before birth? Yes. Because true education is primarily subconscious. A child is not a little animal which you can start training as soon as it is old enough. A mother can have a beneficial influence on her child in the womb through the harmony of her thoughts, acts and feelings.

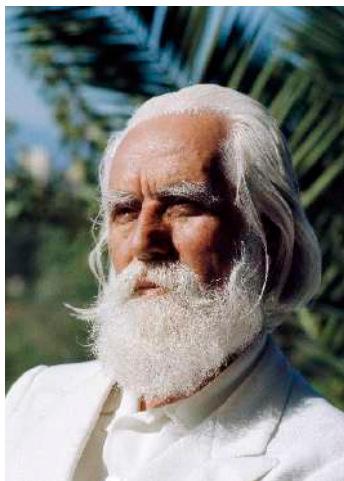

And this pre-natal influence must be faithfully continued once the baby is born, for, as all parents should realize, a tiny baby is highly sensitive to its environment. Ultimately, it is by example that parents and pedagogues should accomplish their educational mission.'

Youth: Creators of the Future

'Of course, young people do not have the power to impose their will immediately, but they can at least start by saying no to those who try to take them down tortuous paths. That is why it must first be very vigilant and make a selection in everything it is offered, knowing that it is an easy prey for all those who have not very Catholic interests to defend.'

The distinguished philosopher and spiritual Master, Omraam Mikhaël Aïvanhov (1900 - 1986), was born in Bulgaria. In 1937 he moved to France, where he lived and taught for almost fifty years until his death. One of the most striking aspects of the Master's teaching is the enormous variety of ways in which he presents the one central theme of man and his growth in perfection. Whatever the question under discussion, it is invariably dealt with in terms of how man can better conduct his life.
